Burgo Group. The 2006 Company Report promotes the Group' activity and its new visual identity.

The 2006 Company Report of the Burgo Group, the largest manufacturer of graphic paper in southern Europe, consists of seventy pages that are attractive to look at and easy to read.

The Report illustrates both the economic and financial data contained in the financial statements, and the Group's activities, strategies, programmes and investments, with particular emphasis on innovation, on the environmental and quality certification obtained for individual plants and products, and on the development of the energy sector.

The 2006 Company Report is the first document to adopt the Burgo Group's new visual identity, with a graphic language that expresses the two distinguishing features that set the Group apart from the competition: the fact that its core business is printing paper, and the fact that it is a southern European, Mediterranean company.

The first aspect is reflected in the choice of a font that mixes classical and modern elements, and in the use of signs and classical typographic characters that combine in an unusual way to form original decorations that remain identifiable as belonging to the printing world.

The second aspect is underlined by the choice of typically Mediterranean colours. Olive green, Pompeian red, Racing red, Ancient pink, Ochre Yellow and Overseas blue are reproduced in a multicoloured bar all down the page, and this, together with the black of the printing and the blue and grey of the Burgo Group logo, brings the page layout to life.

The Company Report has been prepared in Italian and in English, and can be downloaded from the website www.burgogroup.com.
