New Burgo Group product catalogues: the world of paper at your fingertips

Two handy, new working tools with which to present the extensive range offered by the leading southern European manufacturer of graphic printing papers.

These are the Burgo and Marchi product catalogues, available on paper and on line, consultable at www.burgogroup.com and downloadable from the respective product sites.

You will find succinct descriptions of the technical features of the main papers, organised by end-use and presented in the standard substances. Consulting technical data sheets, people from the sector will find all the information they need to endorse their choice of the product most suitable for their needs: substance, caliper, brightness, opacity, gloss and smoothness, and type of printing and use envisaged for more than 30 types of paper.
