

BURGO GROUP ANNOUNCES THE ROADMAP ESG “GO2030 – GROWING SUSTAINABLY”

Altavilla Vicentina, 10th October 2023

Burgo Group strengthens its commitment to environmental sustainability and social responsibility and presents “GO2030 – Growing Sustainably”, a strategic plan designed to reduce the environmental footprint through a deep analysis and evaluation of fundamental and priority issues for Burgo: decarbonization, water resources optimization, the reduction of manufacturing waste, the sustainability of its products, responsible supply, wellbeing and security at work.

Environmental sustainability and social responsibility have always been fundamental in Burgo’s business, that dedicates the greatest attention at these issues by virtue of its cultural, instrumental and inner value of what the Company produces: paper.

GO2030 represents the road map through the Group sustainability goals that have been defined according to the strategic guidelines of the United Nations 2030 Agenda. The action program is based on measurable goals and on a transparent communication in order to offer good practices models to partners, stakeholders and other entities involved in the sustainable development challenges.

Burgo faces these challenges through a concrete approach and a specific ESG strategy that includes identifying priority issues and the definition of a material map, measurable goals and transparent performance indexes, and, finally, the creation of a roadmap for the rollout of all necessary actions.

Burgo's goals for 2030 are, for example, the reduction of 45% of CO2 emissions (Scope 1 and Scope 2), the use of 40% energy from renewable sources, the recovery of 99% of production waste, the development of 95% recyclable products, the selection of 100% sustainable suppliers, chosen according to the ESG drivers. Moreover, the Group believes that it is part of the process and of the corporate ethic, to involve all its employees and collaborators in the promotion of social responsibility and sustainability.

At the following [link](#) it is possible to consult the new Burgo's section dedicated to the GO2030 project and the list of the ESG goals defined by the Group according to the United Nations 2030 Agenda.

BURGO GROUP

Burgo Group is a leading European manufacturer of papers for communication, speciality papers and paper for corrugated cardboard. The Group constitutes an actual 'system' developed around the world of paper: production, distribution, paper recycling and processing of forest products, but also factoring and energy. A complete range of high quality products, an aptitude for research and development of innovative solutions, and a strong focus on the environment: this is how Burgo Group has established itself as a key partner in the communication, printing, publishing, converting and packaging sectors, thanks to a business vision embedded in a wider system. It is no coincidence that the Burgo Group makes sustainable development and the principles of the circular economy a key aspect of its business and this is apparent in all its processes, from the purchase and use of resources, to the recovery of waste water and the optimisation and reuse of waste for energy production. The Burgo Group carries out its industrial activity through 10 plants, 9 in Italy and one in Belgium, with 13 production lines.
